LEARNING CONTRACT

Total # Weeks

15.00

Hours Per Week

15

Total Hours at Site

0.00

List your specific job responsibilities

- a. Actively participate in learning opportunities from subject matter experts
- b. Construct solutions to priority technical related project tasks such as application development, help desk application design and implementation, development of knowledge management and analysis of large data sets to advance business capability and expand knowledge base
- c. Demonstrate problem solving skills and ask clarifying questions
- d. Develop a rapport with fellow interns and engage with Paradyme employees
- e. Devise and defend the best solution to complex problems
- f. Practice public speaking skills
- g. Engage in learning lunches with Paradyme Executive, Project, and Corporate staff

What do you expect to learn from the internship?

I believe that my internship experience will provide ample learning opportunities to build my problem solving skills. I wish to use my knowledge to accelerate decision making and promote revenues by enabling the organization to develop new insights, detect and fix problems at their nascent stage and gain competitive advantage. I would be able to put my analytical skills to practical use by analyzing the organization's datasets.

How does this apply to your career goals?

I wish to pursue a career as a consultant in the field of Business Intelligence and Data Analytics. Consultants need to possess strong interpersonal and communication skills. Apart from the analytical knowledge that I would gain through the internship I would also like to use to this opportunity to build my inter-personal skills which will be very useful to build my professional career.
